Matching Colors.

Once the metallic process is applied, the colors will be distorted significantly from what appears on screen.

Use your physical swatches to reference these colors, to see how they come out in real life.

Swatch Library
Installation Guide.

Ai

Ai

Step #1.

In the Swatches panel, open the "burger" menu (top right)
and navigate to **Open Swatch Library > Other Library...**

Step #2.

Navigate to, and select the **SupaMetallics.ase** file.

Step #3.

To view the M-codes alongside the colors, open the burger menu on the new swatch library and select either **"Small List View" or "Large List View".** Additionally, to keep the swatch library open, you can select "Persistent". We'd also recommend saving your workspace after doing this.

DONE! - Supaeasy.

If you every close the swatch library and want to open it back up, navigate to **Window > Swatch Libraries > Supametallics** to bring it back.

Step #1.

In the Swatches panel, open the "burger" menu (top right) and navigate to Import Swatches...

Step #2.

Navigate to, and select the **SupaMetallics.ase** file.

Make sure your file type is set to **.ASE**
Otherwise the file will not appear.

Step #3.

To view the M-codes alongside the colors, open the burger menu once again and select either **"Small List" or "Large List"**.

DONE! - Supaeasy.
