Spot Metallic.

This option is used when you only want specific colors in your artwork to be made metallic. To achieve this, vector artwork is necessary.

When ordering this option, create your artwork with CMYK values matching the provided Color Option swatches.

List out what parts of your artwork is required to be metallic in the **Job Comment** and the **Color** fields, using the M-codes and / or CMYK breakdowns.

Flood Metallic.

With this option, we apply the silver ink to the entire artwork file. The metallic effect will be more visible in lighter colors and less visible in the darker.
Please Note: any white in your artwork will turn silver.

When ordering this option, please specify in both the **Job Comment** and **Color** fields that the order is to use Flood Metallic.
